Why CFGI

CFGI

OUR UNDERSTANDING

CONTEXT AND OUR PROPOSED ROLE

ABIVAX has selected Oracle-NetSuite as the implementation partner for a 9-month, single-phase NetSuite ERP deployment. CFGI has been engaged to provide an independent advisory layer across the program.

CFGI's role is not to implement, it is to protect ABIVAX's interests throughout the process: ensuring the design is right, the delivery is on track, and the program is built to last.

Three pillars will define this engagement:

Paris Program Coordination and Change Management: Walid Bouassida, and Youness Tyamaz serve as ABIVAX's day-to-day support in France, acting as the bridge between the program structure and France finance organization

US Technical Leads & Oversight: Shine Thomas, Ken Schatz and Brad Quillen serve as NetSuite Center of Excellence to challenge and provide validation at each design and build milestone to ensure the program stays practical and appropriately scoped

Controls and SOX Readiness: Angela DePoy and Ashley Williams draw on CFGI's knowledge of ABIVAX's SOX needs to ensure new processes are control-compliant from Day One (under the lead of the Paris team)

PROPOSED SERVICES & ENGAGEMENT MODEL

SCOPE OF SERVICES AND DELIVERABLES

- **Engagement Setup**
  - Kick-off, RACI alignment, methodology onboarding, and engagement scoping to establish effective boundaries between CFGI advisory and Oracle delivery team responsibilities.
- **Program Governance & Status Reporting**
  - Weekly status participation (French team) and bi-weekly participation (US team). Steering committee materials, governance reporting, action log management, and ABIVAX stakeholder coordination.
- **Business Process & Functional Support**
  - Requirements documentation review, end-to-end transaction flow assessment, and functional design challenge, ensuring Oracle's design matches ABIVAX's operating needs and not simply a default SuiteSuccess configuration.
- **US NetSuite Team Implementation Session Participation**
  - Direct participation in design walkthroughs, integration sessions, build Q&A, UAT, and cutover planning by the US NetSuite SME team.
- **Stage-Gate Reviews** *(see Slide 7)*
- **Controls-by-Design (SOX Integration)**
  - Mapping ABIVAX's existing SOX controls to the NetSuite configuration, reviewing configuration controls, and validating UAT test scenarios against the controls framework. Fastpath SOD Assessment by CFGI as part of the NetSuite Implementation will be considered (optional).
- **Change Management & Adoption**
  - Employee interviews, advise change strategy, communications plan, adoption monitoring, and SOX-integrated ways-of-working design.

STAGE-GATE FRAMEWORK

In addition to the day-to-day involvement by CFGI resources, five formal review checkpoints align to Oracle's delivery milestones. At each gate, CFGI produces an independent written assessment before ABIVAX authorizes Oracle-NetSuite to proceed.

Gate	Milestone	Estimated Timing	Estimated Hours
Gate 1	Project Initiation	Week 3	7 hrs
Gate 2	Design Complete	Week 16	17 hrs
Gate 3	Build Complete	Week 28	22 hrs
Gate 4	UAT / Cutover Readiness	Week 36	13 hrs
Gate 5	Go-Live and Transition	Week 39+	11 hrs

Each gate includes pre-read documentation review, a structured review session with Oracle, and a written gate memo delivered to ABIVAX leadership.

Gate memos represent CFGI's primary deliverable: an independent, written record of program health at each milestone.

CONTROLS AND SOX INTEGRATION

CFGI brings an existing understanding of ABIVAX's control environment into the NetSuite implementation. This is a meaningful differentiator as most advisory teams would need weeks to understand the landscape that CFGI already knows.

Our controls-by-design approach ensures:

- **Day-one compliance considerations**
  - NetSuite configurations align to SOX controls before go-live, not after
- **No post-implementation remediation**
  - Common and costly in ERP implementations where controls are treated as a post-go-live workstream
- **UAT validation**
  - SOX-relevant scenarios are embedded in UAT test scripts, not bolted on
- **Ways-of-working design**
  - New NetSuite-native processes are documented in a SOX-ready format from the outset

© CFGI | ALL RIGHTS RESERVED

CHANGE MANAGEMENT

The success of a new ERP is often ultimately a people question. ABIVAX's finance and operations teams will need to adopt new processes, new workflows, and a new system, all simultaneously, at go-live.

CFGI's change management workstream runs throughout the project:

- **Early phase**
  - Employee interviews to understand any current-state anxieties, readiness gaps, and informal change agents within the organization.

- **Mid-phase**
  - Change management strategy and communications plan, tailored to ABIVAX's culture and the specific scope of NetSuite's impact on each user group.

- **Late phase**
  - Adoption monitoring, feedback loops during UAT, and SOX-integrated ways-of-working documentation so new processes are audit-ready on day one.

PROJECT FEES & ASSUMPTIONS

EFFORT AND FEE ESTIMATE

Our philosophy is to provide high-quality, full-scope services for a fair and competitive fee. The intent of our proposed fee structure is to reflect our genuine investment in the Abivax relationship - on both sides of the Atlantic - and our confidence in delivering a complete solution without surprises. Our estimated fees to complete the areas in scope by resource are as follows:

ENGAGEMENT TEAM — EFFORT & FEE SUMMARY (before VAT and expenses)				
Name	**Role**	**Rate (€/hr)**	**Est. Hours**	**Implied Est. Fee (€)**
Jean-Arnold Coutareau	Partner, France	€340	46	€15 640
Angela DePoy	Partner, Risk (US)	€340	34	€11 560
Shine Thomas	Partner, Technology (US)	€340	10	€3 400
Ken Schatz	Managing Director (US)	€290	72	€20 880
Brad Quillen	Senior Manager (US)	€240	114	€27 360
Walid Bouassida	Director, France	€290	187	€54 230
Youness Tyamaz	Consultant, France	€160	520	€83 200
Ashley Williams	Director, Risk Advisory, France	€290	80	€23 200
TOTAL			**1 063**	**€239 470**

Blended rate: ~€225/hr. These rates are even lower than our discounted SOX rates for ongoing work, showing our high motivation and commitment to Abivax to be your partner in conjunction with the NetSuite implementation project.

Average weekly pace: ~27 hrs/week across all resources.

Fastpath Segregation Of Duties (SOD) assessment by CFGI as part of the NetSuite Implementation is optional (not included above).

TEAM & WAY WE WORK TOGETHER

MEET OUR TEAM

Transatlantic Team Combining Local Process Knowledge, and NetSuite and SOX Expertise

Jean Arnold Coutareau
Partner
Paris, France

Jean is the Managing Partner of CFGI in France. With 30 years of leadership, accounting and finance experience, Jean has deep knowledge in business transformation, complex accounting, internal controls, international financial reporting, capital markets and transaction advisory in international environments.

Walid Bouassida
Director
Paris, France

Walid is a Director in Financial & Accounting Advisory in France with 16 years of experience. A French CPA, he leads process optimization and complex projects in retail, construction, logistics, and services.

Walid has supported Abivax's SOX remediation since September 2025.

Youness Tyamaz
Consultant
Paris, France

Youness is a Consultant at CFGI France with cross-border experience in financial reporting and audit. Skilled in IFRS, French GAAP, and US GAAP, he supports complex reporting, accounting integrations, and audit readiness.

Youness has supported Abivax's SOX remediation since December 2025.

Shine Thomas
Partner, Technology Transformation
United States

Shine brings 20+ years advising across industries and leading end-to-end finance transformations. As leader of CFGI's ERP Practice, Shine drives business-led Cloud ERP implementations covering the full finance cycle—from process design and data to deployment, adoption, and value realization.

Kenneth Schatz
MD, Technology Transformation
United States

Ken brings 20+ years delivering strategic finance transformation, technology enablement, and operational excellence. A proven EPM/ERP leader, Ken specializes in Oracle NetSuite, Oracle EPM, and Sage Intacct, driving scalable designs, disciplined deployments, and measurable business value.

Brad Quillen
SM, Business Transformation
United States

Brad Quillen is a Solution Architect and NetSuite consultant delivering scalable ERP solutions across industries. He specializes in complex system architecture and data-flow design to enable advanced reporting, analytics, and process optimization, aligning technology with operational goals.

Angela M. Depoy
Partner, Risk Advisory
United States

Angela is a Partner in CFGI's Risk Advisory practice and brings with her more than 19 years of client service experience. She has served organizations ranging from federal agencies to pre-IPO companies to Fortune 100s and primarily focuses on SOX Compliance and MW remediation for biotechnology and consumer/industrial and construction products industries.

Angela has supported Abivax's SOX remediation since September 2025.

Ashley Williams
Director, Risk Advisory
Paris, France

Ashley is a Director joining CFGI's Risk Advisory practice in Paris. She brings with her more than 10 years of client service experience, including NetSuite implementation projects. She has focused on SOX and control implementations during high-stakes projects, as well as on IPO readiness and capital market transactions.

Ashley is a Chartered Professional Accountant in Canada and a Certified Internal Auditor by IFACI in France

Jean Arnold Coutareau
Partner
France

How we will work together for ABIVAX :

- **ABIVAX at the core —** Sponsor/Stream Leads set priorities, make decisions, and validate designs, data, and controls.
- **CFGI Technical Lead and Implementation Partner Oversight team —** Challenge and provide validation at each design and build milestone to ensure the program stays practical and appropriately scoped
- **CFGI Local PMO, Change Management and Functional support team —** On-site coordination, RAID/plan, stakeholder comms, training & adoption, cutover; leverages prior ABIVAX SOX remediation context.
- **CFGI SOX "Controls-by-Design" team —** Ensure new processes are control-compliant from Day One and RCMs are updated contemporeanously

CFGI

WHY CFGI

WHY CFGI

- **We know ABIVAX**
  - Existing engagement means minimal ramp-up on the control environment, the people, or the organizational context

- **We know NetSuite**
  - The US NetSuite team bring deep NetSuite implementation expertise, specifically in SuiteSuccess Financials environments for companies of ABIVAX's size, industry, and complexity

- **We are independent AND invested in your success**
  - CFGI has no stake in Oracle-NetSuite's delivery. Our only mandate is ABIVAX's success
  - CFGI views this as a long-term partnership opportunity, not a system implementation

- **We are already here**
  - The Paris team is local, French-speaking, and available. No travel friction, no time zone lag, no coordination overhead

- **Stage-gate accountability**
  - Structured go/no-go checkpoints mean ABIVAX always retains control of the decision to proceed
