01

Context and objectives

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organization.

Context and objectives

CONTEXT

- ABIVAX is a French clinical-stage biotechnology company developing innovative immune-modulating therapies, with a focus on chronic inflammatory diseases.
- Headquartered in Paris, ABIVAX has a growing presence in the United States, where the VP Finance and the project director are based.
- This dual footprint drives ERP requirements including multi-currency/multi-GAAP capabilities, SOX 2 compliance, and bilingual support (French/English).
- ABIVAX has selected a new ERP to support its growth and reduce time spent on operational/manual activities.
- A key operational challenge is the decentralized Purchase-to-Pay (P2P) process managed by all employees, meaning the new ERP will significantly change day-to-day habits and require strong user adoption.

OBJECTIVES

- Secure the ERP deployment end-to-end, ensuring the solution is fit-for-purpose, covers ABIVAX's operational needs, and reflects its specific context (France/U.S. footprint, multi-currency, bilingual usage, and SOX 2 expectations).
- Protect the project timeline and key milestones to achieve a Go-Live on January 1, 2027, with a controlled cutover, clear ownership, and proactive risk/issue management.
- Drive fast and sustainable user adoption, through change management, role-based training, and hypercare, so employees can use the new tool confidently and efficiently as quickly as possible.

3 key challenges to make your ERP project a success

ERP aligned with business needs

Ensure the selected ERP solution adequately covers business and technical needs, controls implementation complexity, and is configured to Abivax's operational context and compliance requirements.

User Adoption & Change Management

Drive adoption and user proficiency for the future ERP, particularly across procurement / P2P users, given the significant changes versus current processes and tools.

Dual Footprint Alignment & Vendor Control

Ensure day-to-day alignment between a US-based Transformation Director and Europe-based business and integrator teams, while providing strong vendor management and interface coordination to keep delivery on track.

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. 02

Our approach

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organization.

We propose a structured approach in 3 key areas to support the implementation

OBJECTIVES

1 – FUNCTIONAL ASSISTANCE

- Ensure that the needs expressed are considered in the target solution
- Secure processes and solution through controls integration and SoD compliance by design
- Initialize the target system with compliant data
- Validate solution parameters and interfaces with third-party solutions
- Prepare and orchestrate solution go live
- Organize post-go live support

2 – CHANGE MANAGEMENT

- Build clear project value case and design a tailored change approach and governance
- Understand key roles impacted and identify changes & associated change required activities
- Build Communication and Engagement Plan and associated key messages
- Identify role-based training needs and build training curriculum

3 – PROJECT MANAGEMENT

- Mobilize teams and remind them the priorities
- Monitor compliance with deadlines, scope, quality of deliverables, budget and resources
- Ensure risk control
- Prepare and orchestrate solution Go-Live

POWERED Methodology – Enhanced with AI

KPMG Powered delivers a 360° framework to secure ERP programs across all phases—from scope definition through deployment—**now supported by AI at key steps to improve speed and reliability** :

- Conduct precise analysis on Day-to-day workshops to identify and refine business needs
- DevOps setup and governance to support the development stream
- UAT creation and orchestration (planning, coordination …)

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. Our KPMG Powered framework to secure and accelerate ERP projects

KPMG Powered, our 360° approach to securing an ERP project at different stages, from scope definition to deployment

01

Target Operating Model

The organization's purpose and roadmap

- **Operating models** by **industry**, **function** (16 functions) and **technology**
- **Functional mapping and process taxonomy to visualize ERP functional coverage**

02

Powered Technology

Tools and accelerators to facilitate implementation

- **Pre-configured processes and** pre-developed automation engines
- A **detailed playbook** for **project management** according to the **Powered project methodology**

03

Powered Evolution

Business Continuity Support Services

- Managed ***Services*** and the necessary post-deployment support
- Establishment of **governance** (e.g., change management), **core services** (patching, KM, etc.), and **value-added services** (security management).

16 Functions

Marketing, Sales & Service; Commerce; Supply chain; Procurement; Resilience; Internal Audit; ESG; Finance; HR; IT; ESM; Cyber; Risk

6 TOM Dimensions

Process; People; Model de delivery; Technologies; Data & Analytics; Governance

12 Platforms

SAP; ORACLE; coupa; workday; servicenow; Microsoft Dynamics; salesforce; ivalua; SailPoint; okta; MetricStream PERFORM WITH INTEGRITY

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. We propose a structured approach in 3 key areas to support the implementation

	Vision	Validate	Construct	Deploy	Evolve
Objectives	Refinement of target processes and digital solutions	Target validation and approval workshops	System configuration, integrations, unit tests, SIT	UAT, production and commissioning	Hypercare and knowledge transfer
Functional assistance	▪ Assist to functional workshops of the design phase ▪ Conduct a critical review of the detailed design file ▪ Conduct the gap analysis review & manage arbitrations ▪ Ensure internal control / SOX coverage (controls and access)		▪ Define Data migration strategy & monitoring ▪ Define Acceptance / UAT strategy & monitoring ▪ Generate the test cases	▪ Manage and follow UAT Manage and follow the data migration ▪ Define Cut-Over / Deployment plan	▪ Define Post go-live support procedures and sizing ▪ Assist key users during the first months

Change management	▪ Define vision & case for change
	▪ Identify key roles impacted and build Personas
	▪ Define Change overall plan and approach
		▪ Build communication plan & key messages
		▪ Define training approach and plan
		▪ Identify training needs and build training curriculum
			▪ Build change plan
			▪ Set up change toolkit
			▪ Develop detailed communication plan
			▪ Formalize training plan
				▪ Change roll-out
				  ▪ Deploy toolkit
				  ▪ Deliver communications
				  ▪ Assist trainings
					▪ Refresh & adjust the change plan
					▪ Monitor KPIs

PMO	▪ Organize Kick-off meeting
	  ▪ Initiate risk log
	  ▪ Initiate schedule
	▪ Initiate project dashboards
	  ▪ Ensure Meetings planification
		▪ Update and follow project monitoring dashboard
		▪ Prepare presentation support and write minutes of governance meetings (project status, steering committee)
		▪ Monitor risks & update risk log			

Optional

© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organization.

An approach consistent with the integrator's proposed approach

Our structured Approach…

	Vision	Validate	Construct	Deploy	Evolve
Objectives	Refinement of target processes and digital solutions	Target validation and approval workshops	System configuration, integrations, unit tests, SIT	UAT, production and commissioning	Hypercare and knowledge transfer

… that Fits with the Integrator Approach

	ENGAGE & DRIVE	Enable	Convert	Optimize
Activities	• Review personalization requirements • Build core configuration • Configuration Walkthroughs	• Final process walkthrough • Unit Test • Data migration test • UAT	• Data migration • User End Training • Cutover	• Hypercare phase • Plan for future phases

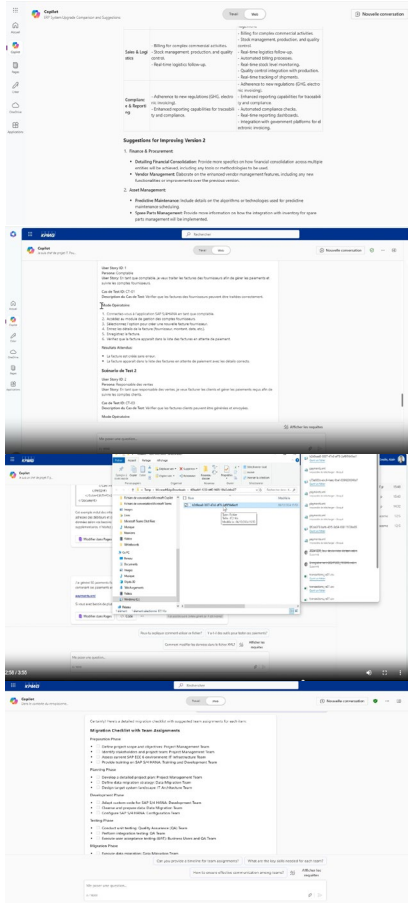
© 2026 KPMG ADVISORY, a French simplified joint stock company (société par actions simplifiée) and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. All rights reserved. The KPMG name and logo are trademarks used under license by the independent member firms of the KPMG global organization.

How generative AI can help in all areas throughout the ERP project

The below is non-exhaustive. Screenshots are extracted from use cases executed by KPMG with Copilot

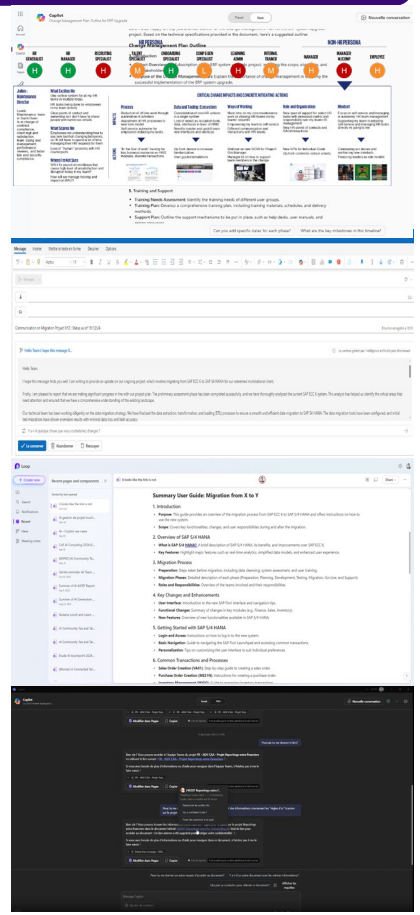
1 – FUNCTIONAL ASSISTANCE

- Review design documents
- Draft test plan with detailed test scenarios and acceptance criteria
- Create test datasets with dummy data, anonymize datasets
- Draft migration plan and checklist



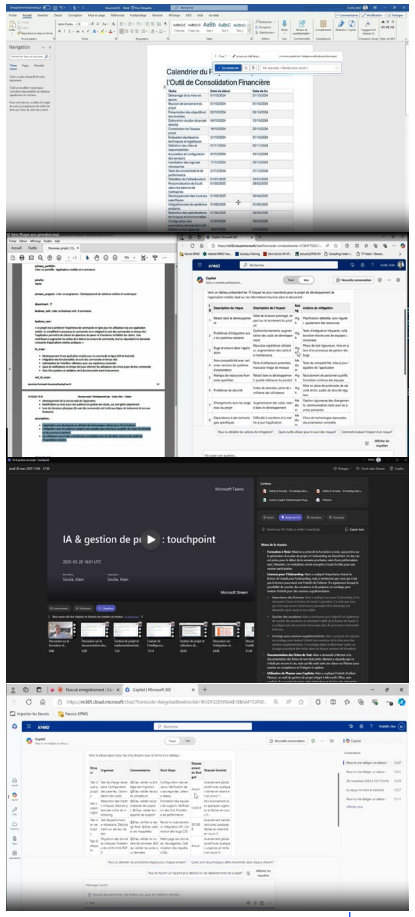
2 – CHANGE MANAGEMENT

- Identify key roles and associated impacts
- Write communications in various languages
- Draft user documentation and role-based training materials
- Support onboarding and answer user queries



3 – PROJECT MANAGEMENT

- Estimate initial schedule and draft content for kickoff materials
- Produce initial risk log and mitigation actions
- Assist in meetings (e.g. planning, minutes)
- Produce content for the project dashboard



KPMG

Règles d'or

3 — Respect de la séparation des tâches (A)

- **La matrice de séparation des tâches SAP** est adaptée aux **besoins métiers** et **IT,** et respecte les principes des contrôles généraux informatiques (ex : SOD entre développeur et implémentation).
- La **définition des profils d'accès** ; (i.e. nouveaux rôles ajoutés à la bibliothèque des rôles standards SAP) est conforme à la politique de séparation des tâches au niveau des utilisateurs.
- Les principes de séparation des tâches s'appliquent **au niveau de la définition des rôles** mais aussi en cas de **cumul de rôles**.
- **Les conflits d'accès éventuels** sont documentés et compensés par des contrôles adaptés.

4 — Revue des accès et droits (A B)

- **Les accès et droits des utilisateurs** font l'objet de revues régulières, avec une revalidation effectuée en collaboration **avec les équipes métiers et IT.**
- La revue inclut l'ensemble **des utilisateurs à droits étendus** et **aux transactions critiques métiers** et **IT** (i.e. administrateur sécurité). Afin de s'assurer de l'exactitude du périmètre de la revue, l'identification des utilisateurs se base sur les **objets d'autorisations et leur valeur associée**.
- **Les employés et externes sortants** perdent immédiatement leurs droits d'accès à tous les systèmes informatiques.

Our convictions for what it takes to lead successfully the deployment and adoption of your solution

WHY DO WE BELIEVE CHANGE MANAGEMENT IS KEY TO YOUR PROJECT SUCCESS

- Go beyond the usage of the system only by understanding and integrating the emotional and rational dimension of change
- Ensure all teams understand the processes and the new role they will have to play on top of the how to navigate the system itself
- Ensure coordination and engagement between US and French teams to reach common success
- Empower operational and finance teams at each steps of the process and are fully clear on what they should be doing or not
- Address ABIVAX's specific operational and cultural challenges

WHAT WILL BE KEY TO ENSURE AN END-TO-END ADOPTION

BUILDING COMPETENCIES:
"In the flow of work" training, based on day-to-day scenarios, to succeed in front of tomorrow's challenges (CSRD, data, etc.)

ENGAGING EXPERIENCE:
Specific adoption actions by role, to maintain interest, engagement and implications of your teams in the project

SHIFTING MINDSETS:
Through an analysis by role/persona of emotional and rational reactions

ENSURING UNDERSTANDING:
With targeted and engaging communications

VALUE REALIZATION:
On-shelf, pre-built assets to avoid starting from 0 and focus only on your specific challenges, risks and opportunities, and maximize value realization

Sustainable and Scalable Adoption Approach

Supporting your people as they move through their individual change journeys

Awareness → Understanding → Adoption → Sustainment

© 2026 KPMG ADVISORY, a French simplified joint stock company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a Private English company limited by guarantee. Our Change approach aligned to Powered methodology

A change support designed to match your deployment calendar during each implementation phase

	VISION	VALIDATE	CONSTRUCT	DEPLOY	EVOLVE
OBJECTIVES	Frame the change	Start designing change levers	Construct change levers	Deploy change	Monitor and adjust change
ACTIVITIES	▪ Identify & onboard change representants ▪ Define & set-up an integrated change governance ▪ Align on change approach and plan ▪ Identify key impacted stakeholders and change readiness ▪ Build case for change	▪ Build personas and assess needs for each ▪ Create role-based communication plan and identify associated key messages ▪ Build Training approach and plan ▪ Define Training curriculum per Persona	▪ Develop a communication assets as per plan ▪ Develop Training content based on training strategy and curriculum (for TTT and End-Users), including SOX requirements ▪ Plan TTT sessions	▪ Deliver and roll-out communication plan ▪ Animate TTT sessions and post TTT Q&A ▪ Deliver training content and support trainers ownership	▪ Monitor success, feedback, noises and risks to adjust change actions as needed ▪ Plan refresher communications as needed ▪ Monitor training completion ▪ Plan refresher training as needed
KEY DELIVERABLES	▪ **Case for change** ▪ **Change Plan & Governance** 	▪ **Personas** ▪ **Communication & Training plan** ▪ **Training strategy & curriculum** 	▪ **Communication content** ▪ **Training content** 	▪ **Training & Communication deployment** 	▪ **Adoption surveys** ▪ **KPIs** 
Optional

Our detailed change activities and deliverables

Based on your initial needs, we have selected a list of activities and deliverables that we believe will be critical to secure your upcoming deployment as part of the Vision & Validate phases of the project.
In addition, we have identified complementary activities/deliverables that would support further your team in reinforcing adoption approach and content.

INCLUDED IN OUR OPTIONAL OFFER

	CHANGE SCOPING AND PLAN	COMMUNICATION AND ENGAGEMENT	TRAINING
CORE SUPPORT	• Change/Adoption approach, governance and plan for upcoming deployment • Persona Lab (and workshops), key components and major impacts related to the project (at Central level)	• Case for Change (PPT-based) including the why/how/what of the project • Persona-customized communication plans (incl. key messages to address for each key communication/ engagement activities)	• Training approach and plan • Training needs analysis and associated curriculum per each of our in-scope persona • Training content structure and templates (POC)
CORE+ SUPPORT	• Change Toolkit content (PPT-based document with imbedded plans, guidance and templates) made of a mix of approach/ methodology guidelines and starting points based on standardized Change material (e.g. Communication and Training plan with content)	• Case for Change (animated video, 2 mins max) • One Pager “What’s in it for me” by Persona for Finance & Procurement roles • Email scripts and templates to cover key project topics: Launch, Fit-Gap workshops completion, training logistics & invitation, pre-Go-Live, Go-Live and celebration, Hypercare guidance • 1 Sponsor video: studio format at KPMG with sub-titles, up-to 5 mins • Post-go live surveys and monitoring	• “Flat”/paper-based job aids (highlighting attention points, process steps and roles involved) for key processes • Train-the-Trainer (TTT) materials and Instructor-Led/Webinars Training (PPT-based) based on Core Model • TTT session animation – Up to 2 days • E-learning for in-scope processes – max 30 mins each (incl. video demos for key steps in the system)

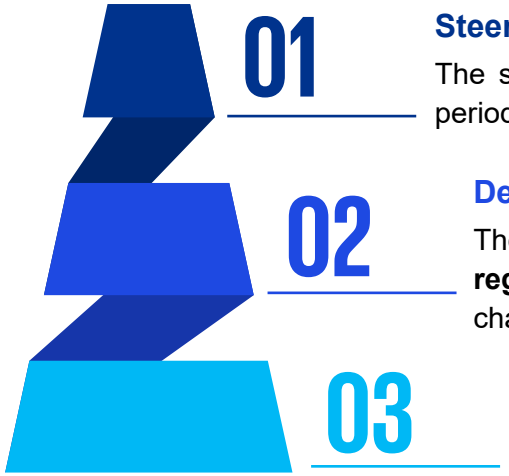
Governance

To ensure coherent and efficient management of the new ERP implementation, a standard three-level governance structure will be put in place. The aim is to mobilize the appropriate resources to make decisions at each level and escalate arbitration points.



Steering Committee (every 2 months)

The strategic committee enables us to carry out a **strategic review** of the application over a 2-month period, and to ensure project direction.

Design Authority Board (monthly, on design phase only)

The design authority board is essential **to ensure transversal communication** and **decision-making regarding business topics** during the design phase**.** It could last after design phase in case of a scope change for example.

Project Committee (weekly with the BPO)

The project committee provides a frequent review of services in progress, to ensure that projects are **well managed and progressing smoothly**.

Efficient steering for fast decision-making

	STEERING COMMITTEE	PROJECT COMMITTEE	DESIGN AUTHORITY BOARD	REVIEW CONTRACT & BUDGET
	▪ Steering Committee ▪ Relationship Mapping ▪ Escalation of Unresolved Issues ▪ Solution and Business Arbitration ▪ Communication Strategy	▪ Weekly Monitoring ▪ Project Planning ▪ Risk Management ▪ Change Management	▪ Overview of streams (sales, supply, finance) ▪ Follow-up of design decisions by functional domain ▪ Analysis of impacts on other domains ▪ Tracking of gaps	▪ Resource Management ▪ Financial Monitoring ▪ Analysis of Change Requests ▪ Analysis and Monitoring of SLAs
	▪ Meeting Minutes ▪ Planning ▪ Risk Monitoring ▪ Scope Monitoring	▪ Progress Status ▪ Project Monitoring (RAID: Risks, Assumptions, Issues, Dependencies) ▪ Deliverables Tracking	▪ Documentation and Tracking of Gaps ▪ Monitoring of decisions taken ▪ Update of steering committee	▪ Budget Reporting and Monitoring ▪ KPIs on SLAs ▪ Scope Monitoring
	▪ Every 2 months	▪ Weekly	▪ Monthly (during Design phase)	▪ Monthly
	▪ Project sponsorship ▪ Project manager ▪ KPMG project team ▪ Integrator project team ▪ BPO Local Country	▪ Project manager ▪ KPMG project team ▪ Integrator project team	▪ Project manager ▪ KPMG project team ▪ BPO sales, BPO supply, BPO finance	▪ Project manager ▪ KPMG project team

Comments:

- We propose to conduct one-third of the steering committee meetings in person in Paris to centralize for Europe. Additionally, we suggest holding some steering committee meetings in the countries involved in the deployments, at least for the sponsor and the project director.

Our financial proposal

FEES

- Our intervention will take place exclusively within the context described in this document.
- This financial proposal is based on our understanding of your needs, our prior discussions and our experience on similar projects.
- In the table below, we present the estimated intervention times for the scope of our 3 support areas, which are scheduled to be carried out for a period of 9 months, as well as the budget for the corresponding fees.

Phase	Man-days	Total
Functional assistance	*171*	*231 200€*
Change management	*100*	*110 400€*
Project Management	*32*	*28 500€*
Total	**302**	**370 100 €**

INVOICING

- The VAT (Value Added Tax) at a rate of 20.0% should be added to this budget.
- Our fees will be invoiced according to the following schedule:
  - 30% deposit upon receipt of your approval;
  - Invoicing at the end of each steering committee meeting;
  - Payments are due upon receipt of the invoice

EXPENSES

- Our fees for this type of assignment are exclusive of taxes and expenses.
- Expenses will be billed separately and on an actual basis. Professional expenses include, as per professional norms: travel expenses, accommodation, and meal expenses.

Expertise

IT & Digital Strategy, Enterprise and Solution Architecture, Program Scoping and Management, Lean/Agile Operating Model, Change Management

Profile

Sébastien has 20 years of consulting experience in information systems management, transformation project leadership, and IT function management. Positioned as a long-term partner, he works closely with clients to scope and lead the implementation of complex transformations: digital strategy, IT master plans, business IT transformation (sales & omnichannel CRM, Industry 4.0), and new IS/IT operating models.

He leads the development of architecture capabilities at KPMG France, contributing to the scoping and implementation phases of digital transformation or IT modernization initiatives.

Work Experience

Scoping of Digital Transformation Programs & Business IT Modernization

- Visioning & strategic alignment
- Leading workshops for needs analysis and architecture, defining the target application landscape and roadmap
- Developing business cases with a systemic approach (expected benefits / budget estimation)

Architecture

- Leading and designing various types of IS (e-Commerce, Omnichannel CRM, Supply Chain, Master Data Management, Data Analytics, BI, etc.)
- Technical scoping on Cloud solutions / Hybridization / API Management / Hybrid Integration Platforms (iPaaS)
- PM/Engagement on design-and-build missions

Digital Program & Transformation Management

- Definition and Setup of Delivery Model: Business Analysis/Product Owner, architecture, development, testing, etc., with on-site, nearshore, and offshore teams.
- Sourcing and RFP Management: Development teams, system integration, vendor/cloud solutions, change management, etc.
- Program steering in agile mode, team coaching, and project manager mentoring.

Digital & IT strategy

- Identification and evaluation of digital technologies to transform business operations and information systems
- Definition of transformation roadmaps and strategic roadmaps
- Development of business cases using a systemic approach (business benefits, technology accelerators, operating model, skills, etc.)

Lean/Agile Operating Models for IT/Digital Functions

- Transformation of IT/Digital Functions through the definition of Target Operating Models and the implementation of change management plans, leveraging best practices from Lean and Agile methodologies (Design Thinking, Lean IT, DevOps, SAFe, etc.)

Senior Manager | Finance Transformation

Toufik Madjoubi

Senior Manager
Consulting Tech
KPMG Advisory

Formation

Software engineering degree (SUPINFO - Paris)

Expertise

Transformation & Business integration (AMOA)

Project Management, Functional

IT Integration & Separation (I&S IT)

Languages

French / English

Profile

Toufik has over 14 years of experience in transforming financial and logistics services. As a Transformation Project Manager, he implements solutions and supports business analysis in complex and international environments. He excels in process modeling and harmonization, financial and logistics risk control, as well as end-to-end management of complex projects. His consulting assignments are related to Microsoft & Oracle technologies, with advanced expertise in Finance and Logistics.

Having led numerous transformation projects involving complex IT architectures, he anticipates risks and proposes remediation measures to secure projects in terms of cost, quality, and timelines.

Professional experiences

Financial Transformation

- For a retail company, led project management and business analysis support as part of a Europe-wide transformation program.
- For an automotive and agri-food distribution company, managed transformation projects for financial services, including the implementation of Microsoft Dynamics 365 Finance & Operations.
- For a service company, contributed to a commercial management transformation project as domain lead for product information management. Responsible for the high-level and detailed design, deliverables, and knowledge transfer.
- For a service company, within a global finance system transformation across 40 countries, managed supplier functional flows and finance localization for the Benelux region. Prepared and delivered train-the-trainer sessions for the Netherlands, Belgium, India, and Poland.
- For a digital security leader, oversaw the review of financial risks in business processes, working alongside the client’s audit and management control teams.
- For a technological research institute, acted as Finance domain lead on an Oracle Cloud transformation project covering HR, Finance, and Procurement.
- For a transport company, led the harmonization and modeling of direct and indirect procurement processes in the Netherlands and France as part of a finance harmonization initiative.

IT Integration & Separation (I&S IT)

- For a multinational trading company specialized in raw materials, managed the IT separation activities of several subsidiaries.
- For an educational group, responsible for IT integration activities of acquired entities.

Aymen BEN ALAYA/ Consultant

Aymen BEN ALAYA

Formation

ESSEC x TELECOM Paris - MS MSIR

HKUST – HongKong University of Science and Technology

ISEP – Engineering degree, Data Science specialty

Expertise

Project / program delivery
Finance IS & ERP

AI strategy & transformation

Languages

French / English

Profile

Aymen is a consultant within the Tech Strategy & Transformation team, following an initial experience in project management at Wavestone. He brings a versatile, end-to-end understanding of IT technologies, architectures, and operating processes. At KPMG, he supports clients on high-impact engagements spanning strategic framing and delivery leadership, with a focus on AI transformation and Finance IS / ERP, while also contributing to internal offer development across these topics.

Professional experience

Finance IS / ERP

- Designed a Finance Core Model for a group spanning 16 entities (target processes, standardization principles, governance baseline).
- Led specifications and deployment phases of the Finance ERP (stakeholder coordination, decision-making support, roadmap and planning).

Group-wide Transformation & Project Delivery

- Led a group-level AI transformation initiative (cross-functional coordination, governance, progress tracking, IT/Business alignment).
- Defined a methodology to identify and prioritize AI use cases across multiple entities (value, feasibility, risks, dependencies).
- Managed the delivery of a Finance IS solution: risk management, resource optimization, budget/timeline tracking, contributor coordination.
- Framed and led a data center sourcing selection to enable inter-subsidiary infrastructure mutualization (scenarios, criteria, recommendation).
- Contributed to the update of the group infrastructure service catalog (industrialization, service clarification, rationalization).

Founder & Treasurer — ILMA (Humanitarian NGO)

- Founded and scaled the organization from 3 to 20 members in 3 years (structure, governance, recruitment).
- Raised €100k in 2 years (campaigns, partnerships, donor follow-up, reporting).
- Designed and delivered 3 rehabilitation projects for medical and educational infrastructure, leading a team of 18 (planning, logistics, execution).
- Oversaw financial governance and compliance, including legal and fiscal-related aspects of the organization.

Assistant Manager – Risk & compliance

Olivia BERRY

Technology Risks
KPMG Advisory Services

Education

Masters in Financial & Control Management
Paris School of Business

Languages

- English/French (bilingual)
- German B1
- Spanish B1

Profile

Olivia joined KPMG after a first experience in consulting at RSM. She has 3 years of professional experience in IT consulting, particularly in SAP. She has worked on several advisory projects helping clients manage their technological risks, mainly in the context of internal control.

Professional experience

Internal Control and Internal Audit in Projects (SAP S/4, COUPA, EBX TIBCO & other ERPs)
Olivia assisted an international group in the cosmetics industry in the redesign of an SAP S/4 HANA Core Model, and specifically contributed to:

- The design of a new risk and control framework for the group, co-developed with the business, internal control, and IT stakeholders, to address the three levels of control ("by design" controls) for P2P, R2R, O2C and F2S processes.
- The implementation of new roles, "SoD compliant by design."
- Supporting internal audit to review the audit methodology, creating a dedicated Internal Auditor role in the tools, and designing specific reports for internal audit.
- Creating training content to support change management and end-user adoption.
- Producing key documentation for onboarding new members of the Group's internal control team and for the deployment of the project in internal control areas.
- Documenting a global view of the project and the tasks of each stakeholder at the Group level, including knowledge transfer documentation and the "IC Playbook" detailing the deployment of the project (roles involved and steps to follow for successful completion of internal control objectives).
- Supporting the "move to Run" phase by creating a RACI matrix to ensure continuous improvement of the project and its long-term adoption by end users.

Olivia also assisted a large international energy group with the implementation of automated detective controls during the deployment of the Highbond tool. She contributed to:

- The creation of automated controls using ACL, implemented within the tool and programmed based on a new risk and control framework for the group, co-developed with the business, internal control, and IT stakeholders, to address the three levels of control ("by design" controls).
- Producing training content to support change management and leading certain training sessions (in both French and English).

Key expertise and sector

- Key Skills: Bilingual in English/French, excellent communication and client relationship skills, highly organized.
- Cross-functional IT Skills: SAP ECC6, SAP S/4 Hana, SOX compliance
- Sectors: Energy, Cosmetics Industry.

Manager – People Strategy and Transformation

Chloé SENKA

People Strategy and Transformation

Sector experience

Consumer Packaged Goods
Pharmaceuticals
Luxury
Retail
Services
Banking

Languages

English/French (bilingual)

Profile

Chloé is a Manager within People Strategy and Transformation practice of KPMG Advisory France. She has delivered multiple change management programs in the context of global organizational, technology or M&A-driven transformations. She has both led programs acting in the capacity of a central change lead, coordinating across multiple parallel global deployments, and has supported on-the-ground changes acting as the “local” change lead.

Professional experience

At a leading CPG led the change stream for the global implementation of ServiceNow across Finance, Procurement, MDM and HR streams (100 000+ employees, global footprint):

- Leading end-to-end change management strategy to support ServiceNow implementation across all countries in collaboration with internal Global Stakeholders
- Definition, execution and continuous improvement of training strategy, curriculum and materials (Train-the-Trainer, e-Learning, Microlearning, Simulations, Job Aids, etc.)
- Onboarding and supporting local change teams to prepare for deployment, develop roll-out change management methodology and toolkit to support local teams

Assisted a leading Pharmaceutical Group in its local Change strategy to support the deployment of global Digital Transformation – Coupa, S/4, Blackline, etc. for Germany, Switzerland and Austria

- Coordination of Change activities among various digital project and ensure consistency among Change activities for end users
- Definition of change needs, coordination of impact analysis, global communication creation and management, training coordination
- Support of project teams to manage change activities

For a mid-sized company in the cosmetics sector – Change Lead for an international deployment of SAP SuccessFactors

- Definition of the Change/Adoption approach, strategy, and communication/engagement and training plan
- Creation of communication and training materials for all audiences (HR, Managers, Employees)
- Delivery of train-the-trainer sessions and oversight of training rollout
- Management of the deployment plan and measurement of team engagement and adoption levels

For a leading company in the energy industry – Change management support in the preparation and operational implementation of a service line reorganization

- Defined the change management plan, onboarding process, and facilitated a community of SPOCs
- Designed and managed change support kits for SPOCs and Managers
- Prepared, facilitated, and led impact analysis workshops to support operational implementation
- Defined and monitored KPIs and implementation dashboards
- Implemented field listening indicators to measure perceptions and drive corrective actions (support mailbox, Mood Survey)

Supported a leading food & beverage company by leading the definition of guiding principles and target operating model for a Change & PMO Transformation office

- Definition of overall mission statement, value proposition, governance model
- Definition of the Change service Catalog and associated RACI to integrate all key stakeholders ; Change Digital tool required to support the Office
- Definition of the Adoption strategy to support the deployment of the new office (from stakeholder engagement plan ; communication and training activities)

Consultant– People Strategy and Transformation

Matéo DEFIX

People Strategy and Transformation

Sector experience

Change Management,
Source-to-Pay Process Training – DAP
Coupa – Implementation Specialist
Sirion – Contractualization process

Languages

- French
- English
- Spanish

Profile

Matéo is a consultant in the People Strategy & Transformation unit, supporting the team in various transformation projects. His role encompasses the creation of new approaches, the development of new processes, and the design of effective change management strategies and training strategies, all geared towards the real needs of our employees.

Experience :

Professional experience
